W-core - waterproof interior and furniture panels

# w-core®

## W-core panels

High pressure laminates (HPL) are applied to Warmotech panel to create decorative waterproof panels known as **W-core**. This innovative panel presents a compelling alternative to conventional particle boards and other materials that may not meet contemporary standards.

It stands as the optimal selection for furnishings and interior applications in need of superior resilience against water, mold and decay. **W-core** exemplifies eco-consciousness as its core layer is made of recycled polyurethane foam which is also formaldehyde-free.

Key specifications:

Thickness range **10-60 mm**

Density **700 kg/m<sup>3</sup>**

Thickness swelling **≤1,0%**

Standard panel format (mm)

**1150x2800 / 1220x3020 / 1220x 3600**

Suitable for both vertical and horizontal surfaces of frequent intense usage, for example: kitchen countertops, store counters, furniture and interior details of wet rooms, ship interior etc.
